31st	Tue	Gopalkala

#### AUGUST HIGHLIGHTS

##### FESTIVALS- INDEPENDENCE DAY

“Long years ago we made a tryst with destiny and now the time comes when we shall redeem our pledge ,not wholly or in full measure ,but very substantially at the stroke of the midnight hour, when the world sleeps, India will awake to life and freedom.” We have heard this umpteen times, and it always gives us goosebumps This year we celebrated 75th independence Day of our country .This is the most honourable celebration of the nation. Irrespective of the cast, creed and religion people across the country celebrate this festival with great fervour, joy and pure patriotic essence. At the stroke of midnight Pandit Jawaharlal Nehru rose the tri color to the sky at Red Fort for the first time.

That was a symbol of the end of the British rule and establishment of a free and independent nation. Ever since, the tradition of hoisting the national flag at the Red Fort by the Prime Minister followed by an address to the nation is still continued. On this occasion offline and online celebration of Independence Day took place in a mesmerizing way at TJIS Aurangabad. Respected Vice-Principal Mrs. Shikha Srivastava Ma'am hoisted the national flag with great respect Ma'am addressed the gathering and extended the warm wishes on the occasion 75th Independence Day with the hope to see India the most progressed and powerful nation on the global platform. She further addressed that how today's children are tomorrow's future, and we must invest time and energy strengthening their skills to make our future the brightest. National

Anthem was sung in full patriotic essence. It was followed by inspiring patriotic song sung by Mr. Santosh Keche Sir. Few teachers attended offline celebration whereas section wise programmes were arranged for grade 1 to 10. For secondary section class wise programmes were arranged. Students were asked to prepare documentary videos explaining the Pre-Independent, Independent and Post Independent era. All the important events were explained by the students in their videos. Students and teachers recalled the stories of bravery and courage of our freedom fighters and paid respect towards them and our nation through their speeches. The young generation is our future for the country. With youth's talents and efforts towards the country, India can succeed more in the future. We need to understand the importance of patriotism and the importance of Independence Day in our country. Together in Unity, we can strengthen our nation for a beautiful future. With this message programme was concluded with the National Anthem.

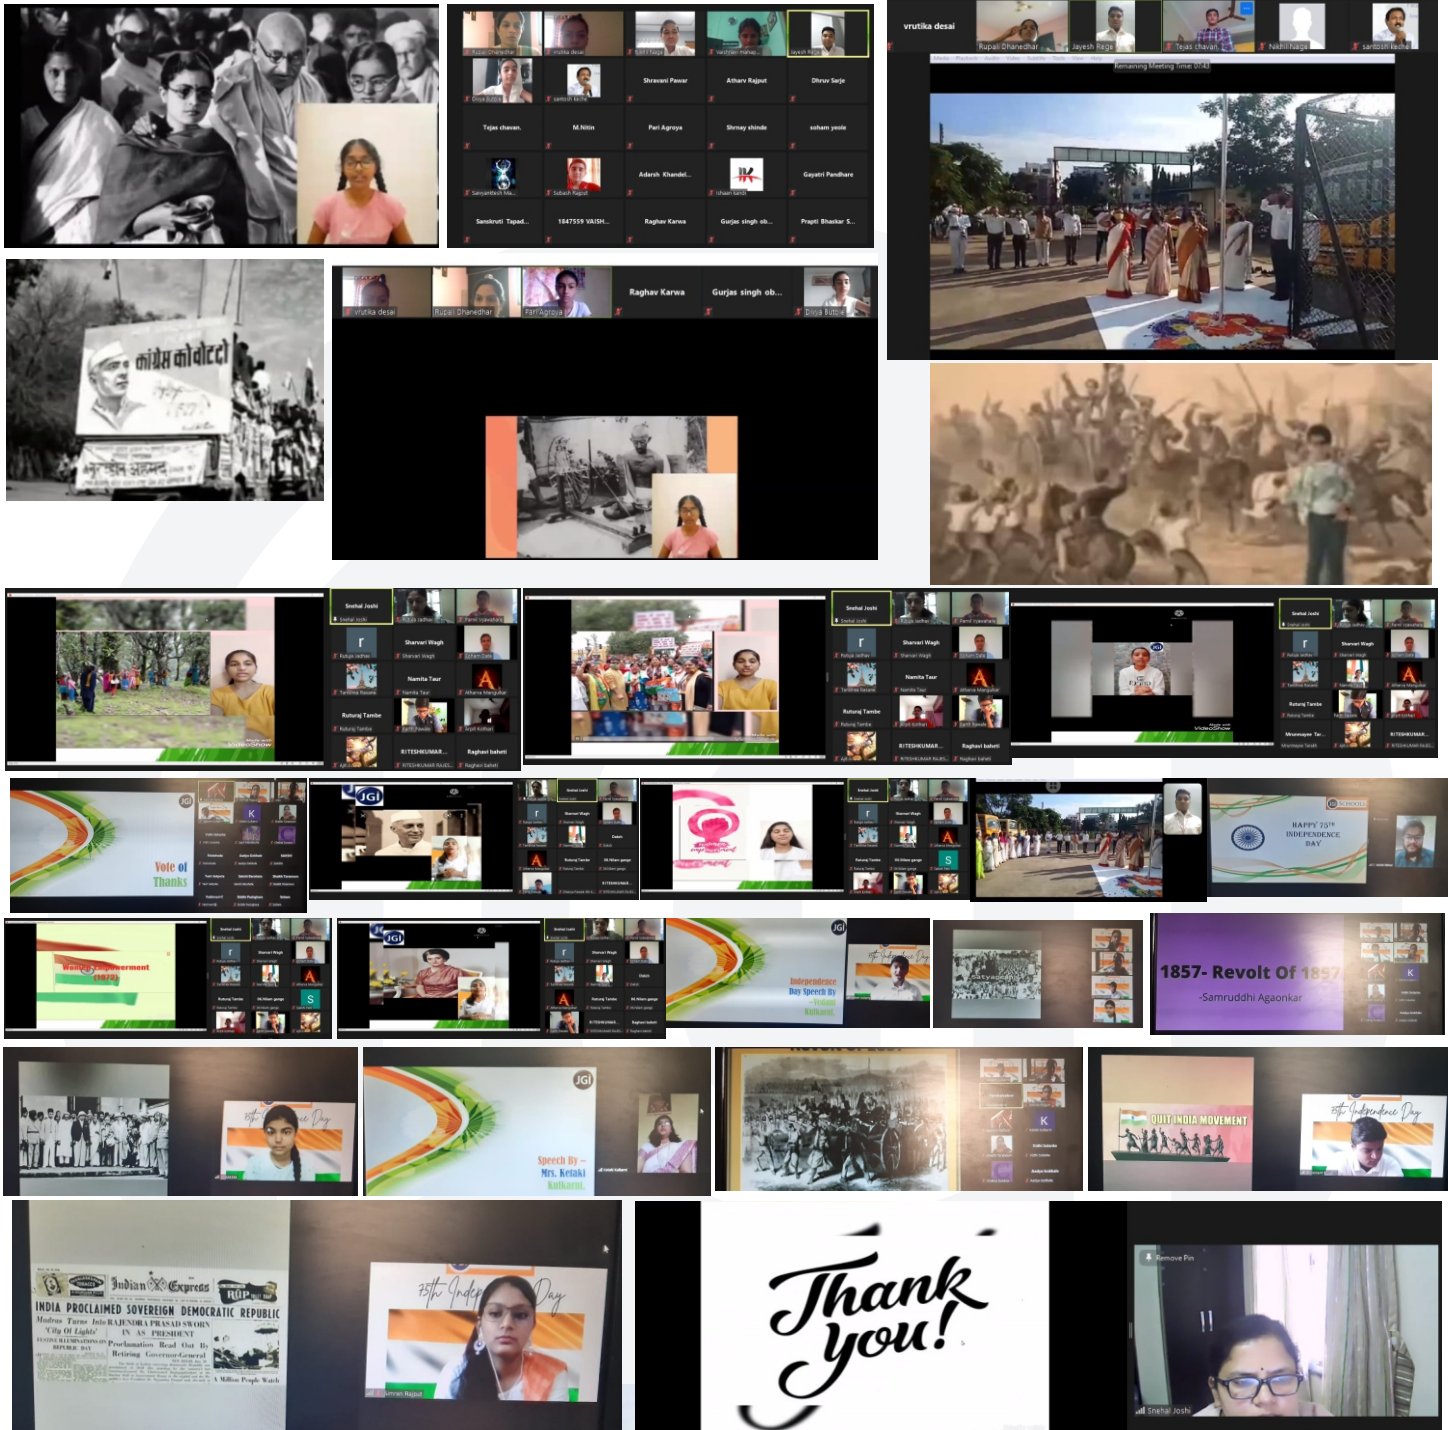

## INDEPENDENCE DAY CELEBRATION

## INDEPENDENCE DAY CELEBRATION

## Message from The Vice-Principal

### FESTIVE FERVOUR

*“Be the celebrators, celebrate! Already there is too much—the flowers have bloomed, the birds are singing, the sun is there in the sky—celebrate it! You are breathing and you are alive and you have consciousness, celebrate it!” — Osho*

It's has been gratifying to witness TJIS Aurangabad grade-X and XII students emerging out with flying colours and have proven their mettle in Board Examination. The month of August observed the celebrations and festivities. The 75th Independence Day was celebrated with great zeal and enthusiasm both online and offline. A variety of activities were planned for the students of grades I – X. On the campus, flag hoisting was conducted which was followed by the National Anthem and patriotic singing

At TJIS Aurangabad, our motto is to strengthen the cognitive and metacognitive skills. In sync with same Skill Enrichment Programme has been introduced from August in order to prepare our students for 21st Century Skills. This is in line with NEP- 2020 which focuses on competency based learning and assessment.

At TJIS Aurangabad,we believe in celebrating all festivals with enthusiasm and vigour, the festival of the bond of love of brothers and sisters that is Raksha Bandhan was celebrated on the virtual platform and the Rakhi making activity was conducted for the students, which they enjoyed. Janmashtami was celebrated with excitement and elation, students participated in the pot decoration and flute decoration activities.

It was thrilling to witness, how the academics went hand in hand with festive fervour. Students attempted periodic assessment along with the sessions of revision and recapitulation. It's highly satiating to witness how our students are participating well in all the co-curricular activities along with focussing on the academics, and preparation for the Term-End Assessment-I.

My best wishes to all my students for the upcoming activities and Term-End Assessment-I.

May you all succeed with bright colours.

**Vice-Principal**  
**Mrs. Shikha Srivastava**

Rakshabandhan is a Hindu festival which is celebrated by brothers and sisters. Sisters tie a Rakhi on the wrist of their brothers. According to the lunar calendar, this festival is observed on the day of the full moon in July or August. Raksha means protection and Bandhan means tie. Brother promises the sister that he will protect her from all the difficulties, enemies, evils and threats always. This festival is a tradition. It is mentioned in Mahabharat. Sisters put Rakhi, sweet, Diya, Haldi and Kumkum on a thali. Brothers bring their sisters favourite things as gifts to give them in return. The rakhi is a symbol of a sister's love that stays with a brother forever. It is a festival to celebrate love of Brothers and Sisters.

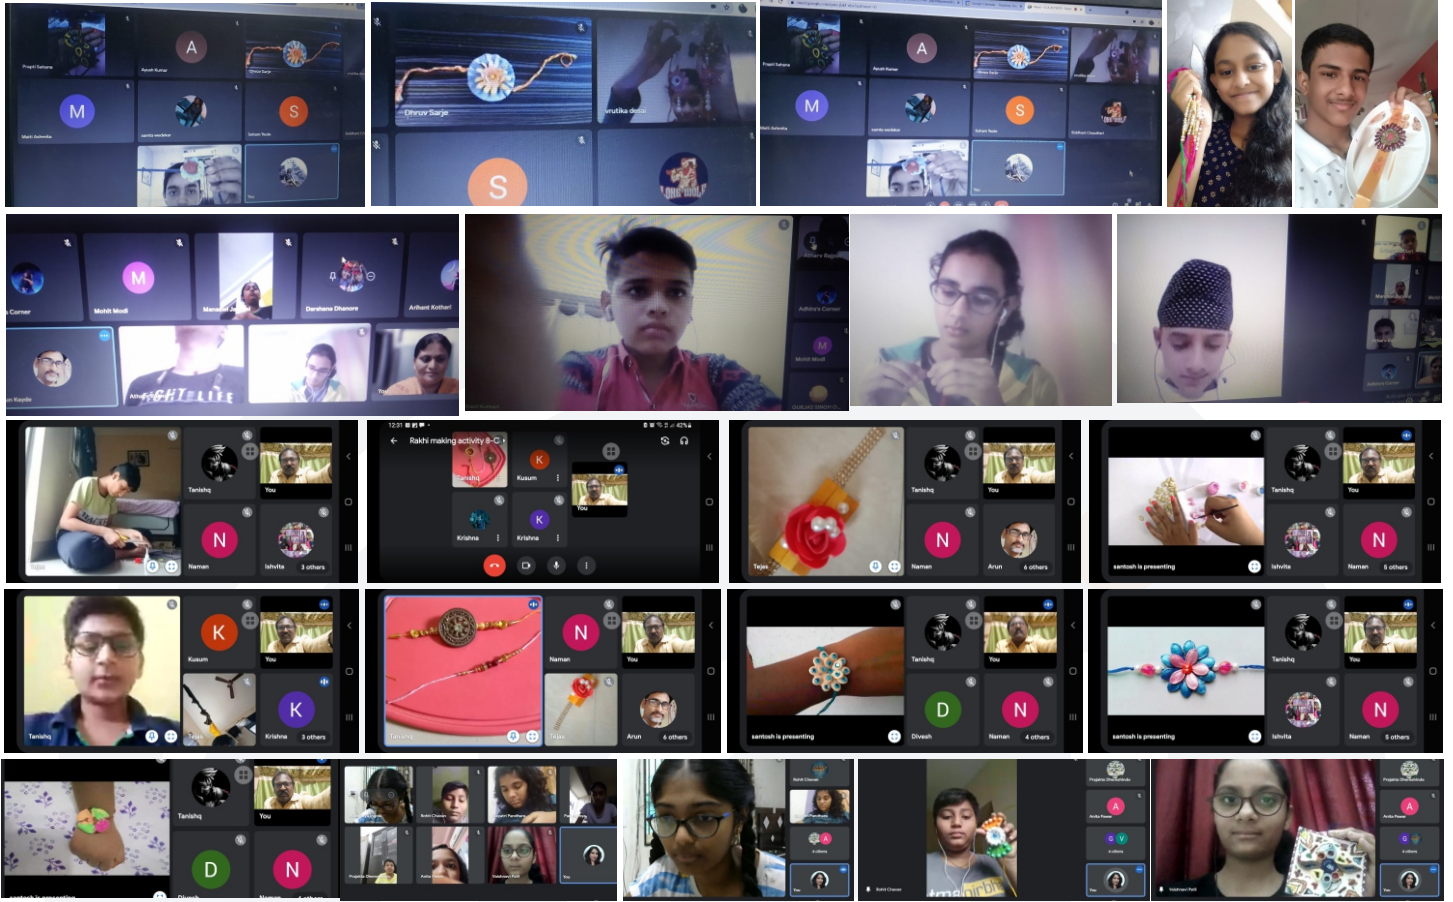

Happy Raksha Bandan

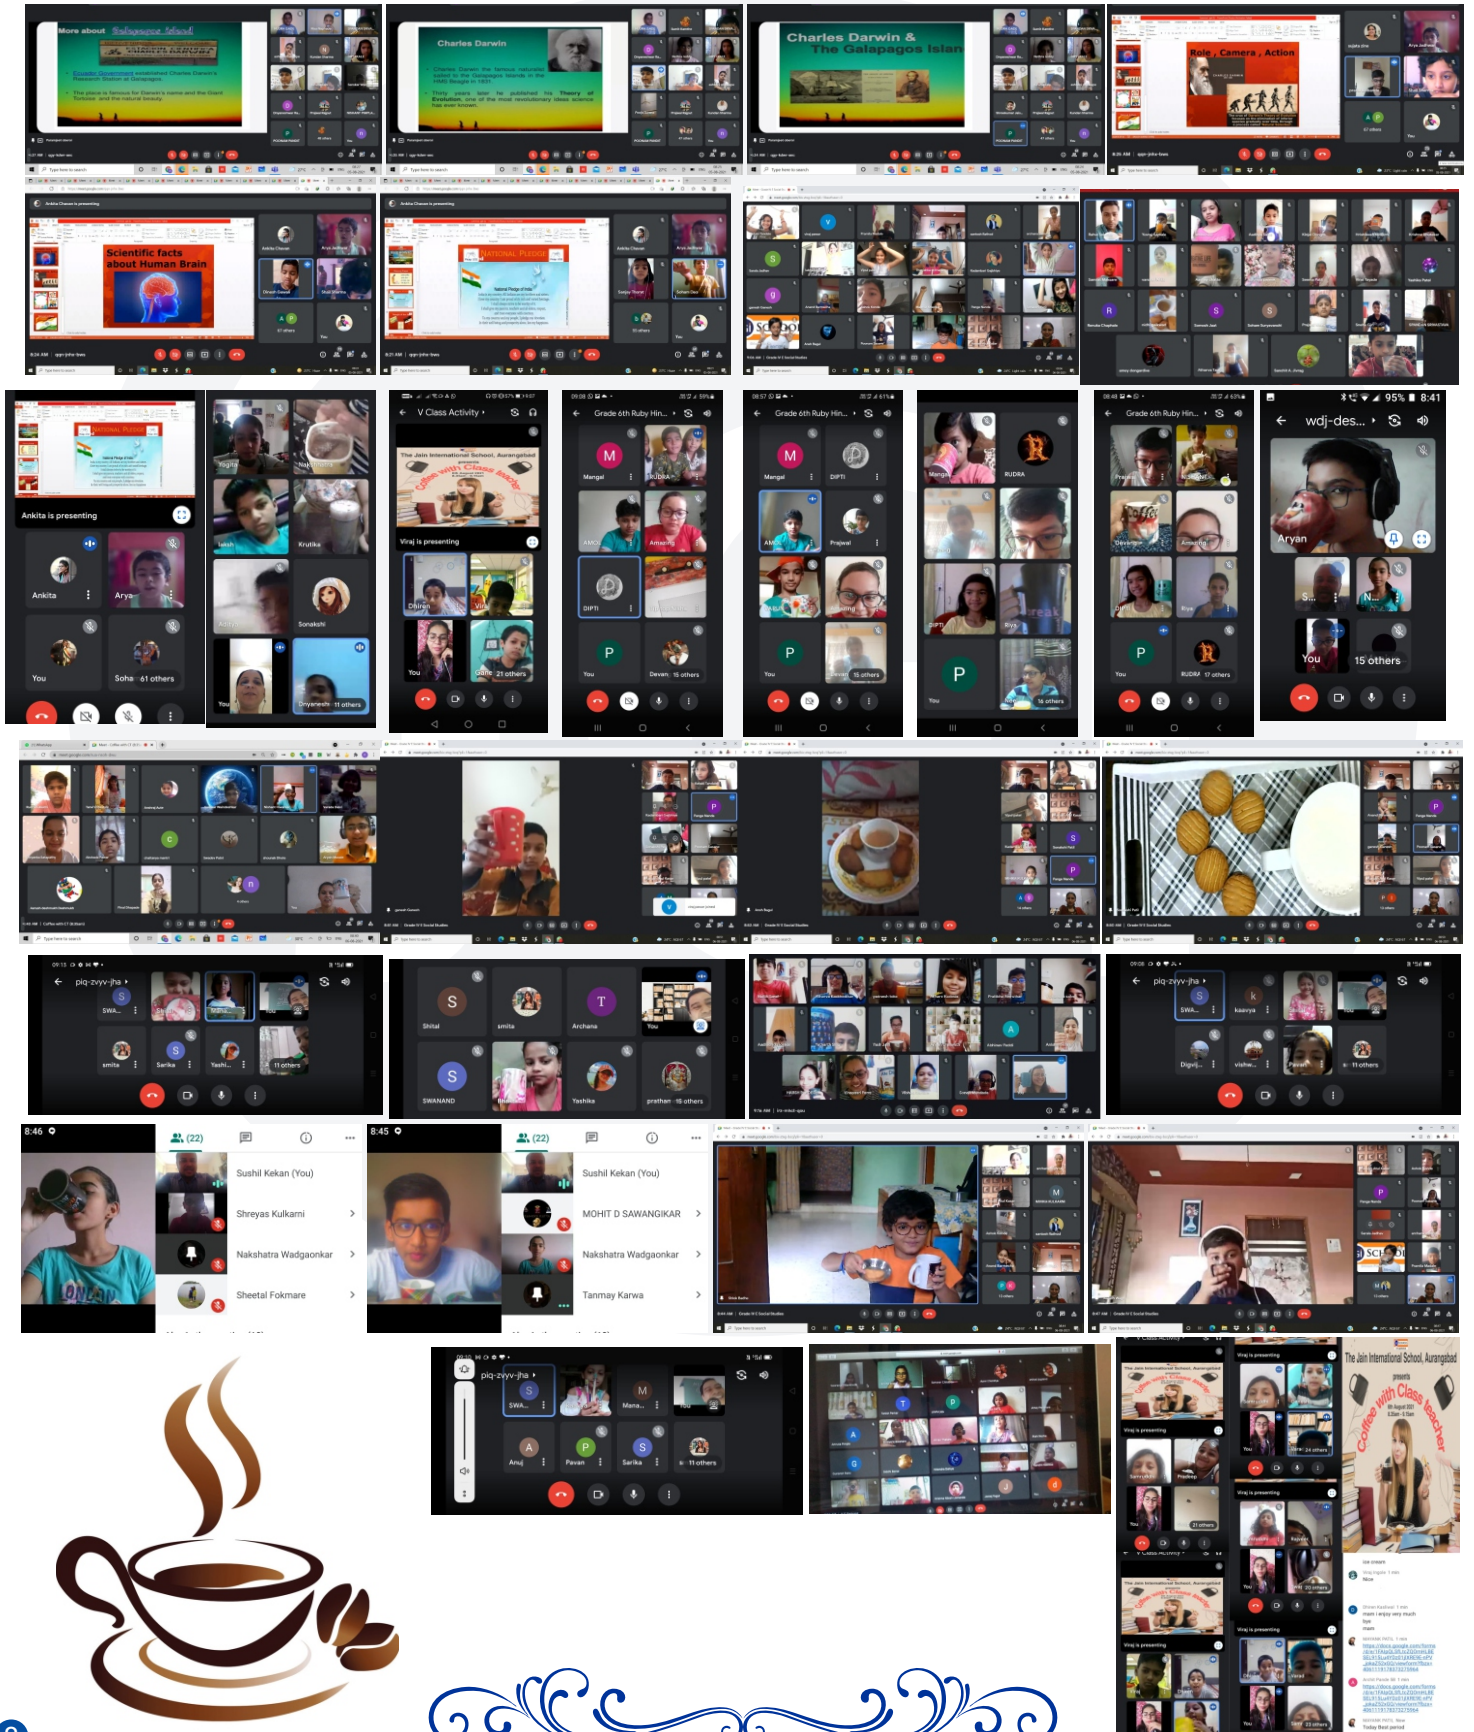

Grade I - X

RAKSHABANDHAN

TJIS has conducted a very cheerful and enthusiastic activity “COFFEE WTH CLASS TEACHER” for the students of Grade IV to VII on 6th August 2021. The activity was an open invitation for the students to share their thoughts, fear, and make the bond stronger with the class teachers. The students spent quality time with their classmates and class teacher with their favorite morning drink. Here are few of the glimpses.

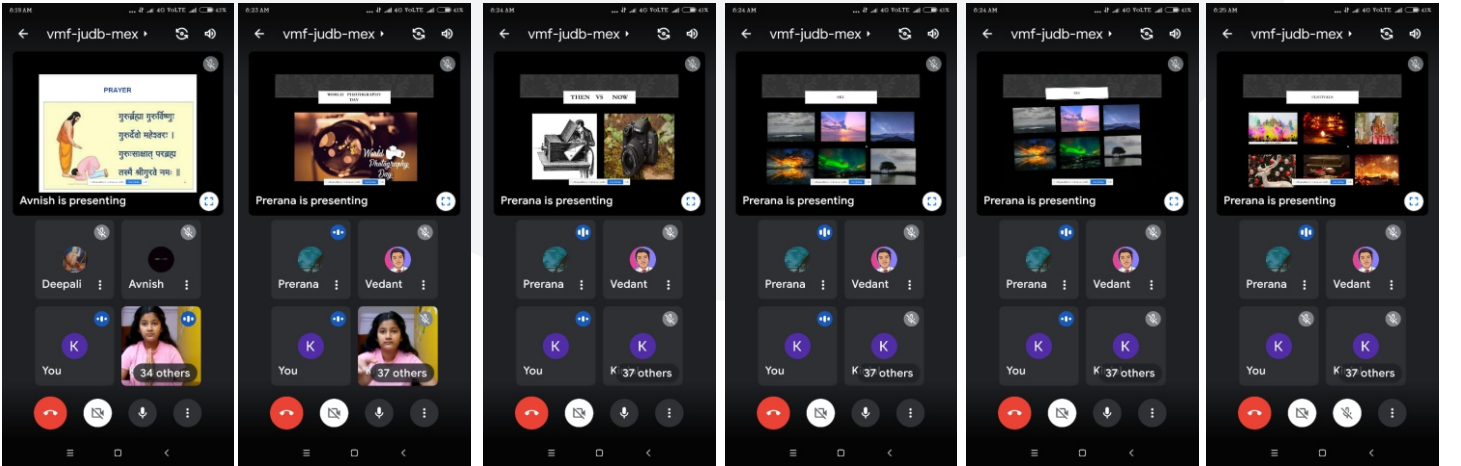

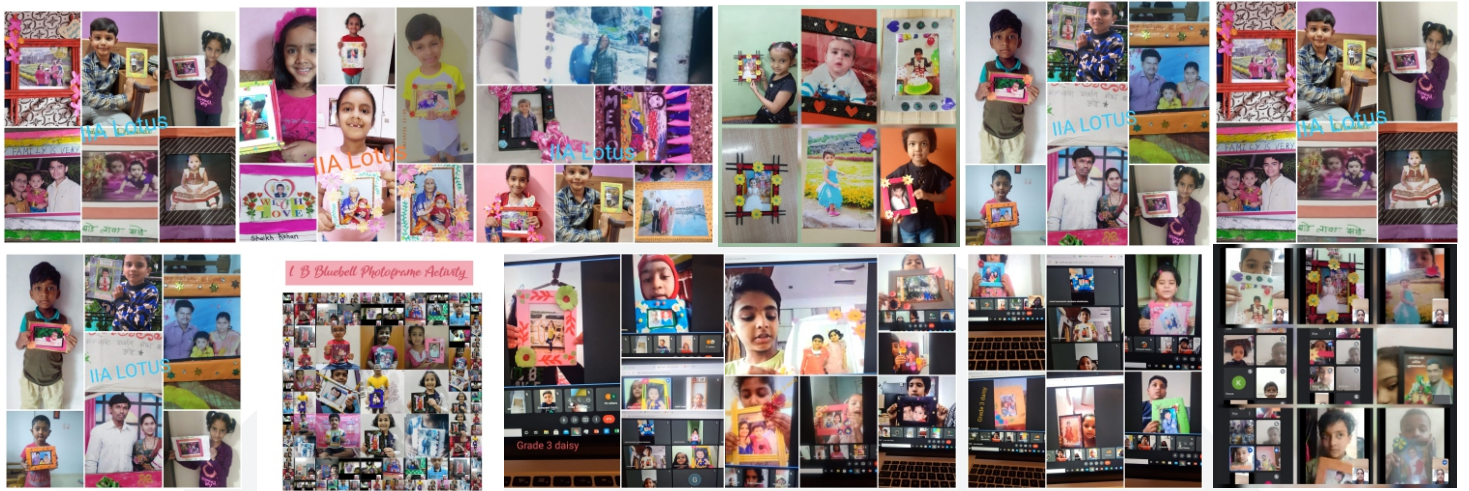

On 13th August 2021, TJIS has organized a Drawing competition taking "INDEPENDENCE DAY" as a theme for the students of Grade IV-VII. The competition was conducted by the respective class teachers on a virtual platform. Students participated enthusiastically and had shown their keen interest in displaying their creativity in a unique way. Certificates for the same were given to the first three positions in best creativity. Here are some of the glimpses of the activity.

## EASIEST LANGUAGE EVER

We all can communicate with each other through language. We have approximately 6500 widely spoken languages around the world. We don't need any enmity to build barriers between people but speaking a different language can create one. Languages are sometimes as easy as pie to learn or sometimes be as hard as the achieving milestone. Some countries have thousands of local languages in them. Now imagine how many of them may be there in the whole continent. Impossible to calculate, right?

So, for this language is created. A kid, a new learner or even the one who had no access to education can understand it. This language is so easy that anyone from anywhere can learn, speak and communicate.

You may be wondering what language this is. The name of this beautiful language is 'Pidgin'. This language has developed due to several misunderstandings between Europeans and people from other countries from the 16th century through the early 19th century. Pidgin acts as a means of communication, but not as some regular vernacular. Pidgin has no native speakers, as the population that uses them is mainly during occasional trade contacts or to maintain their vernaculars for intragroup communication. It is a grammatically simplified means of communication that developed between two or more groups that do not have a language in common. Its vocabulary and grammar is limited and often drawn from several languages. They often lack inflexions on verbs, nouns, articles and other function words (such as conjunctions) and complex sentences. Let's understand this language.

For example:

1. "I don't want any more vegetables." this will change to "Me no vegetable."
2. "He had been drinking milk out the carton when Mom walked into the kitchen." this will change to "He drink milk, mom come."

This thing seems very easy but also awkward for native English speakers.

Thus, they have been characterised as 'broken language' and even as 'chaotic' or apparently without communal conventions. Although, several pidgins have survived for generations and also has maintained a stable system. It is most commonly used in situations while trade is going on. It also comes when both groups speak differently. This is language widely conversed in Nigeria, Ghana, Equatorial Guinea and Cameroon.

It helped several people to communicate with different people all over the world. It is a step towards establishing a peaceful and tolerable world. Maybe one day we all will speak such a simplified language.

## ARTICLE

### "New Morning– New Starts"

Mornings are special time of the day. The day is all fresh and new as a newborn baby. All the opportunities are there, so much hope and expectations in those few hours when most anything can still happen. You plan and map out your day to the best of your abilities and hope you will be able to accomplish everything you set yourself out to do. Every Day is a New Beginning No matter how bad was yesterday, it has passed and today is a new beginning and we have the opportunity to make good of what we have failed to achieve yesterday, so that we could achieve a better result in the future. Each day truly is a gift and some people don't even wake up to see the light of a new day! When most people do wake up and hear the alarm, they hit the snooze button and turn over to catch a few more z's. Before they even get out of bed, they are avoiding the gift of the new day. So Mornings are special and beautiful!

## NEW AND USEFUL APPS FOR STUDENTS

We think that applications are just waste of time. In India, before Covid-19 parents did not support much for digital learning if it is done by apps that are not related to schools or if they are not directly suggested by school. But I want to tell parents that your ward can learn having joy with the help of apps. We just need to expand our knowledge and know which are really useful for students. They will learn various subjects and can polish their Languages. They also help them in doubts of Science and Mathematics with elaborated explanation. They will not only do studies but also expand their General Knowledge which is very important in the world. They will also be updated daily in every field on the Globe. Here are some most famous useful apps for students.

- ❖ Brainly – Students use Brainly to strengthen their skills across subjects such as English, Mathematics, Science, and Social Studies. The platform allows them to connect with their peers, subject matter experts, and professional educators to discuss their subjects and seek answers to their questions.
- ❖ Brain It On – The best app I have ever seen which teaches physics and also enhances our mental ability is Brain It On. It is really wonderful where we draw objects to solve problems and it really increases our thinking level. It looks easy but as you get at higher levels it will be very hard and mind challenging.
- ❖ Inshort – The best app for daily updates in any field is inshort. It shows us frequent updated news in just 60 words in the field we have chosen for news and we can also see whole story by clicking on side link. From this app students our frequently updated of events.
- ❖ Doubtnut – It is very nice app for doubts solving in science and maths. We can see many videos of elaborated solutions on any questions. We can also see many types of solutions.
- ❖ Atomas – Last but not the least, atomas is a wonderful game-type app from which we can learn periodic table easily by having fun!! Learning of periodic table was considered to be most hard thing in chemistry but this app helps us to do this by having fun.

In today's modern age everything has been digital. Parents have to understand apps importance in this world. Their benefits are mentioned all above. From this, we can identify there importance in achieving General Knowledge and Latest Updates. So, we can understand that these applications will be like left hand helping them with studies on their right hand for achieving their life goals.

## RAJASAUROS – AN ANCIENT INDIAN BEAST

Rajasaurus is a genus of carnivorous abelisaurid theropod dinosaur from the Late Cretaceous of India, containing one species: *Rajasaurus narmadensis*. It lived in India when it was an island, due to the break-up of the supercontinent Gondwana, though it is possible animals still were able to migrate to and from nearby continents. The creation of the subfamily Majungasaurinae, and its inclusion of abelisaurids from India, Madagascar, and Europe—including *Rajasaurus*—further reiterates this. It got its name from a single horn on his head which looked like a crown, which got him his first name *Rajasaurus* (king lizard) and *narmadensis* from the place where its fossils were found, i.e. in the Narmada river basin. In 2010, paleontologist Gregory S. Paul estimated the body length of *Rajasaurus* at 11 metres (36 ft.) and weight at 4 metric tons (4.4 short tons). In 2016, its length was estimated to be 6.6 metres (22 ft.). The same year another estimation listed it at 10.5 metres (34.5 feet) and 3 metric tons (3.3 short tons). *Rajasaurus* came from the same species of dinosaurs of the great t.rex. Although we do not have the exact information about *Rajasaurus* and its life. But it was in a true means the Raja of dinosaurs in its territory.

## LORD VISHNU

MATSYA

KURMA

VARAHA

NARASIMHA

VAMAN

PARASHURAM

RAMA

BALARAM

BUDDHA

KALKI

He who is the Supreme Lord, he who is the Supreme Brahman, is famously known as Lord Vishnu or simply Vishnu. He is both the creator and the destroyer. Dash avathara means ten avatars. Lord Vishnu's avatars are called Dash avathara, which include Matsya (Fish), Kurma (Turtle), Varaha (Boar), Narasimha (Half man, half Lion), Vamana (Dwarf, short man), Parashurama (man with an axe), Rama (developed man, ideal man), Balarama (strong man), Krishna (black boy), Buddha (enlightened boy) and Kalki. The Matsya avatar killed Hayagriva, the Varaha avatar killed Hiranyaksha, the Narasimha avatar killed Hiranyakashipu, Vamana gave Devas their heaven by bringing down Bali to the Netherworld, the Parashurama avatar killed twenty-one generations of Kshatriyas, the Rama avatar killed Ravana, Balarama killed Dhenukasura, Pralamabasura, Dvidida, Rukmi, Romaharsana and Balvala, meanwhile Krishna killed Putana, Trnvarta, atasura, Bakasura, Aghasura, Sankhacuda, Kesi, Vyomasura, Kamsa, Narakasura, Paundraka, Sisupala, Salva, Dantavakra, and Viduratha.

## OLYMPICS

The Olympics idea was came by Frenchman named Baron Pierre de Coubertin, who presented the idea in 1894. In every four years athletes from around the world gather at one place to complete in an International Sporting event called Olympics. There are various summer and winter games.

Winter Games :- 1) Curling 2) Bobsleigh 3) Alpine skiing 4) Ice hockey 5) Freestyle skiing

Summer Games :- 1) Athletics 2) Cycling 3) Fencing 4) Wrestling 5) Gymnastics

These are some games played in Summer and Winter in Olympics.

Every player comes in hope to achieve glory fo herself/himself and their country. Olympics involve 200 nations around the globe. Neeraj Chopra got gold medal, Ravi Kumar Dahiya and Mirabai Chanu got silver medal and PV Sindhu, Indian Hockey team, Lovlina Borgohain and Bajrang Punia got bronze medal in 2021.

## PARENTING TIPS ON HOW TO TAKE CARE OF CHILDREN DURING MONSOONS

Nature comes to life during the monsoon season, and as much as we love the rainy season, it comes with its own challenges, especially when you have a kid at home to protect. Here are some tips to take care of your children during the monsoons to protect them from infections.

### Clothing

Climate tends to change drastically during the monsoon season. Daytime may be hot and humid, while it can be pleasant or chilly at night. Soft and light clothing is preferable during day time and an extra layer of clothing with full sleeves will keep kids warm during the nights.

### Keep Warm and Dry

Wetness and dampness increase the chances of infections. Hence, it is pertinent that we encourage children to carry raincoats and umbrellas when stepping out. Even if the child gets wet, we must ask them to change into clean and dry clothes immediately after reaching home.

### Protect From Mosquitoes

Mosquitoes breed in the rainy season which makes the kids prone to dangerous infections like dengue and malaria from mosquito bites. Kids are easy targets for mosquitoes, so cover the child with loose, full sleeves clothing that leaves minimal skin exposed. You may even use mosquito nets to avoid mosquito bites for young children. Child safe mosquito repellent creams can be used on older kids.

### Prevent Diarrhea

Rains and floods cause contamination of drinking water. Diarrheal infections surge due to intake of unclean water. Always use filtered RO water (reverse osmosis) or boiled and cooled clean water for drinking. Frequent hand washing is the key to stay away from diarrhea. Avoid outside food and give fresh home cooked meals.

### Cleanliness

Pooled water, floods, mud and dirty floors can be challenging to clean during rains. Washing hands and feet whenever the child comes home has to be a dictum. The floor has to be cleaned at least twice during the rainy season. Add some floor cleaners with antiseptic liquid to water while cleaning the floor. Ensure that the kid wears clean clothes, socks and footwear. Wash the child's socks daily. Wash and dry the kids' toys at least once a week.

### Balanced Diet

Balanced Diet Ensure that children have a healthy diet, and also try to avoid street food. Include ample greens and seasonal fruits like banana, papaya and pomegranate. Include beetroot in your child's diet, since beetroot is packed with antioxidants, and it increases immunity. Avoid pre-cut fruits and salads. Dry fruits and nuts are among the best foods to boost immunity during monsoon.

### Flu Protection

Do not miss your kid's regular vaccination shots. The best thing you can do to protect your child from the flu is to get them vaccinated for Influenza. It is important to keep the child away from a sick parent or any relative.

You are your child's umbrella, let them enjoy the monsoon while taking all necessary precautions and ensuring covid appropriate behaviour.
