The Month it waz... (November 2021)

**Quotable Quote: “Time is not measured by the passing of years but by what one does, what one feels, and what one achieves.”**

**- Jawaharlal Nehru**

**Special Assembly Presentation on World Vegan Day by Grade VI**

**“The love for all living creatures is the most noble attribute of man.”**

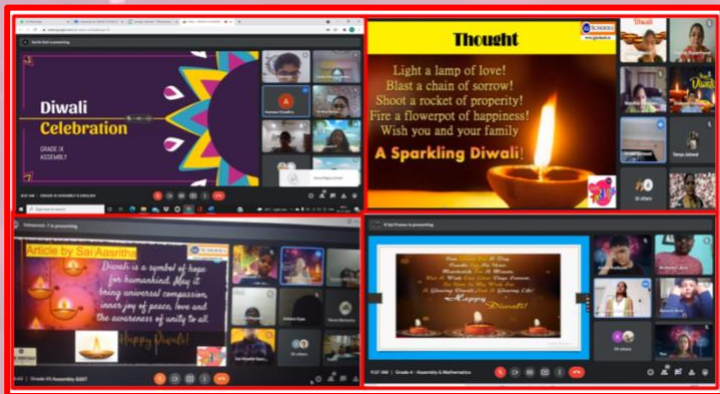

**– Charles Darwin**

**World vegan day is celebrated on 1st of November worldwide by vegans to encourage people to follow a vegan lifestyle since it is beneficial for their health as well as the environment. Veganism means avoiding all things made by exploiting the animals, but one can start from the diet by abstaining from the dairy products like milk, eggs, paneer, yoghurt, and meat.**

**Students of grade VI celebrated World Vegan Day on 1st November. The assembly was a mixed bag of many engrossing activities. Mary Jessica sang a melodious song depicting the message of not killing the animals and letting them be free. A thoughtful poem was recited by Rohitha, a wonderful quiz conducted by Durva. All the students and teachers participated in the quiz. General information about world vegan day was shared by Sai Kruthi and Harshitha. A delicious and easy to make recipe of stuffed tomatoes was shared by Anutara. Many students made fruit salad and vegetable salad and shared the health benefits.**

**Coordinator – Ms. Shuchita inspired the students to be friendly towards animals and prefer a vegetarian diet. Assembly was well planned and informative.**

## Diwali Celebration

Light a lamp of love,

Blast a chain of sorrow,  
Shoot a rocket of prosperity,  
Fire a flowerpot of happiness.

Students of JHCS Kondapur celebrated Diwali on 3<sup>rd</sup> of November-2021 virtually. Diwali, or Deepawali, is India's biggest and most important holiday of the

year. The festival gets its name from the row (avali) of clay lamps (Deepa). To make the students understand the importance of Diwali, teachers arranged for a virtual celebration in school. Teachers explained the importance of Diwali, the festival spiritually signifies the victory of light over darkness, knowledge over ignorance, good over evil, and hope over despair. Children decorated diyas with colors and glitter.

A variety of online activities were organized for students like decorating diyas and candles. In some classes, few clippings of religious movies were shown to teach them the values of life through the characters of Ramayana. All the students dressed traditionally. They danced to different Diwali songs and participated in the activities enthusiastically.

Everyone enjoyed the celebration and spread smiles and happiness around.

Utkarsh Badola

## Special Assembly Presentation on World Tsunami Awareness Day by Grade IX

Grade- III A

Whenever a tsunami takes thousands of innocent lives, a shocked world talks of little else.'

World Tsunami awareness day is observed on 5th of November every year to create awareness about this deadly disaster and how we can protect ourselves from it. A spectacular assembly was conducted by grade IX on the topic "World Tsunami Awareness Day" on 6th November.

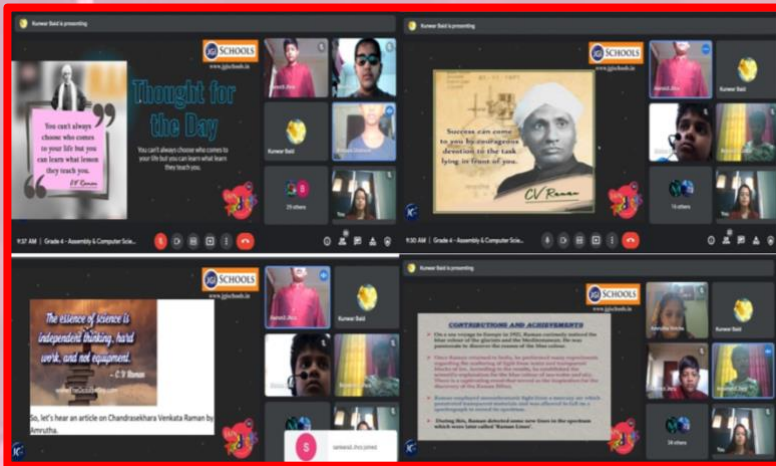

The assembly was carried out very creatively, with enthusiastic RJ's hosting a Radio Show. They commenced the assembly with the prayer, followed by the school song. Students showed loyalty and devotion to our country by taking the national pledge. Students were motivated by a very inspirational thought. They built on their lexicon with a new word. It was all jovial, humorous, and fun, when suddenly a dreadful news broke out - A Tsunami struck the coast of Indonesia. The rest of the show revolved around talking to geologists, survivors, local Policemen, and many journalists. Students were successful in recreating the scene during the tsunami. They then grieved over the lost lives with a minute of silence. The assembly was concluded by humming the National Anthem as patriotic citizens.

Overall, the assembly was informative, and was carried out flawlessly. We hope the audience learned a lot and had a wonderful time witnessing it.

-Rao Shreyas  
Grade-IX

## Special Assembly Presentation on ChandraShekhara Venkat Raman's Birthday

On 6<sup>th</sup> of November, on the auspicious occasion of Chandrasekhara Venkata Raman's birthday, we the students of grade IV conducted a special assembly. Respected C.V Raman Sir was an Indian physicist, who won a Nobel prize for the discovery of the scattering of light and the discovery of the Raman effect.

We started our assembly by praying to the deity. We prayed for a safe, prosperous, and wonderful day ahead. The students were presented with inspirational and virtuous

thoughts that not only gave us moral values but also instilled in us a feeling of pride in our inner - scientist. One of the students presented a very informative and knowledgeable article. The most interesting part of the assembly was when all the students were engaged in answering the questions of the quiz. Answering them was somewhat difficult, but in the end, we were delighted to have gotten the knowledge. As said, "Knowledge to bring the bright sides within ourselves in front of the world. Finally, the students sang the national anthem with pride. Life isn't about finding yourself but creating yourself. Taking that as one of many lessons learnt we dispersed with enthusiasm and zest - all ready for the classes, ready to set new goals. Overall, the assembly taught us about life hurdles and presented the lifetime achievements of C.V. Raman, the great.

-Meeha Siya  
Grade- IV

## Assembly Presentation by Grade V Topic: Service before self

"Only a life lived for others is a life worthwhile."  
- Albert Einstein.

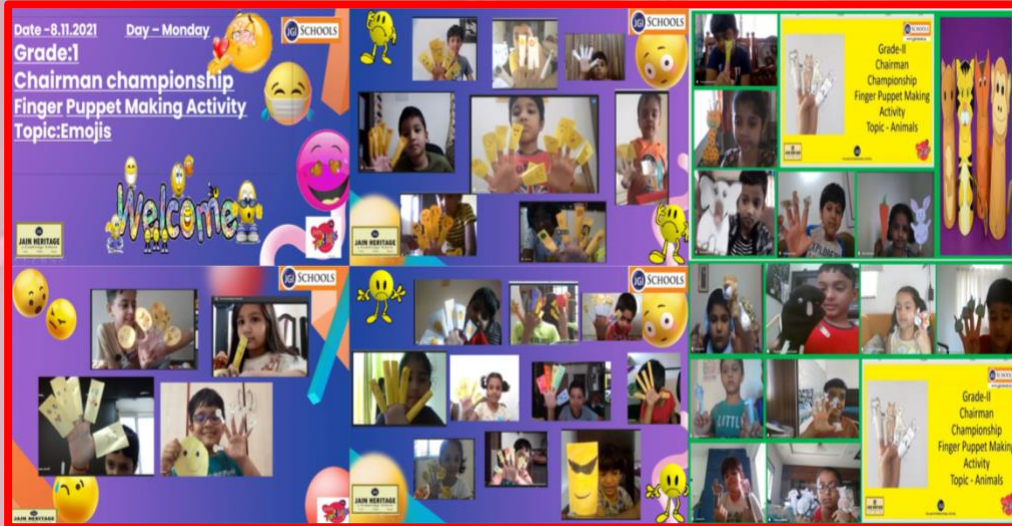

The students of Grade-V conducted the morning assembly on the topic "Service before self" from 2<sup>nd</sup> to 6<sup>th</sup> of November 2021. The day started enthusiastically with prayer followed by a school song. Pledge was administered by Vivek, Mervin and Akhil. Words enhance the vocabulary and help us communicate confidently with others. Word for the day was presented by Sannidhi, Shrivalli and A. Siri. Our class teacher Ms. Jyoti explained the topic in depth. There have been many men and women who have lived for others and devoted their entire lives to looking after the well-being of those who can't do that for themselves. Every year some selected men and women win Nobel Prizes for various causes. Even when they achieve remarkable feats in scientific and technological fields, they are serving society. Some get recognition and others don't, but their goal is serving others even if they are not getting recognition. We learned that we should help the needy.

## Finger puppet making activity for Grade I & II

As part of the Chairman Championship “Finger puppet making” activity was conducted in Grade 1 on 8<sup>th</sup> of November and in Grade 2 on 9<sup>th</sup> of November. A finger puppet is a type of puppet that is controlled by one or more fingers that occupy the interior of the puppet. Finger puppets are generally very simple, consisting of a sheath that the person wearing the puppet (the puppeteer) inserts either

one or two fingers into. While the movement of the puppets is limited, multiple finger puppets can be used on each hand, allowing the puppeteer to control many puppets at one time. Students of Grade I prepared many colorful puppets and expressed their emotions through them as the theme for them was emojis. Students of Grade II prepared many colorful animal puppets, as the theme for their activity was animals. Students also

depicted beautiful stories with the puppets.

## Storytelling activity for Grade III

There's an old saying that states, “Those who tell the stories rule the world”. Students of Grade III A and III B celebrated Chairman Championship Week by participating in the storytelling activity with the help of puppets on 9<sup>th</sup> of November. Storytelling brings language learning alive and creates a participatory and immersive experience that allows young learners to enjoy. Participation in using key vocabulary and phrases through stories can create awareness of rhythm and structure. All the students participated eagerly and enthusiastically with beautiful and colourful puppets. They ended their stories with a meaningful moral. For all the students, storytelling was the most powerful way to put their ideas in front of us.

## Collage Making Activity for Grade IV & V

“Set your goals high, and don't stop till you get there.”-  
By Bo Jackson

We the students of Grade IV and V participated in the CCA collage-making activity on the topic “Sports Around The World” on 10th November, 2021.

There are many sports around the world. Students of grades – IV and grade V made collages by collecting sports pictures from newspapers, magazines and old books. A few students took printouts of pictures from the internet. Pictures of Cricket, hockey, badminton, football, volleyball etc., could be found in old newspapers and magazines. Students collected

pictures of star players like PV Sindhu, Neeraj Chopra and pasted them on chart paper. Students made their collage creatively by writing the names of the games, drawing and pasting pictures of their favourite game. It was a fun activity and we all got to know more about different kinds of sports. It was conducted by our class in charge– Ms Jyoti and our social science educator – Ms Swarna.

P.Siri  
Grade V

## Chairman's Championship

“Winning isn't about getting ahead of others but getting ahead of yourself.”

-Roger Staubach

Incorporating healthy competition into educational systems is a wonderful idea. The Academic Council of JGI Schools (Hyderabad Cluster) recently held the "Chairman's championship" for all branches and classes from the first to the tenth grade. There was a massive turnout. All the pupils had taken part and given it their all. Several activities and events were held in various classes. Grades I and II made finger puppets on the topics of emoji and animals, grade III used finger puppets to tell stories about moral values, grades IV and V made collages on the topics of art and sports around the world, and grades VI, VII, and VIII made posters on the topics of more crops per drop, liberal India, and science for nation building respectively. The "Student Led Conference" that took place on an international level was the highlight of the tournament.

Each school was represented by a three-person team. The conference's topic was the United Nations' Sustainable Development Goals. One of the goals was allocated to each side. The competition was graded on a three-level scale. The first was abstract, in which was like giving a trailer to the next stage. The second step was to submit the research article, which was authored by the team after much research and hard work. The third component was the presentation, in which the teams presented their findings to both the judges and the public, who watched through the livestream of the zoom call held on the official JGI YouTube channel. The judges evaluated the presentations based on their

presentations, orientation, confidence, and, of course, topic coverage. Students were presented with awards for the best abstract, best research article, best presentation, best team, and best speaker at the end of the event. Overall, the tournament encouraged students to be healthy competitors and to embrace collaboration via educational universal issues that would not only benefit them in the future but also create a solid moral foundation. Arya and Ancy

Grade IX

## Children's Day Celebration

Children are like buds in a garden and should be carefully and lovingly nurtured, as they are the future of the nation and the citizens of tomorrow. Only through right education can a better order of society be built up." - Jawaharlal Nehru

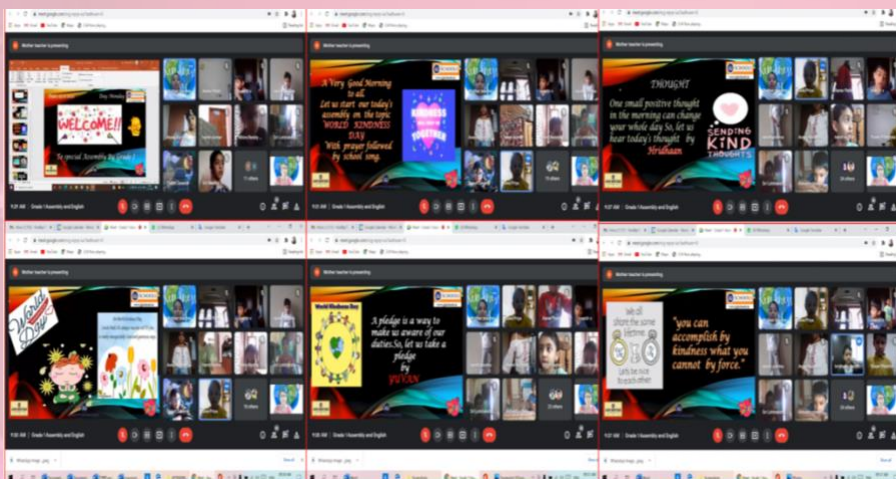

As the nation celebrated the birth anniversary of our first Prime Minister, Pt. Jawaharlal Nehru and his love for children in the form of Children's Day, a Special Assembly had been organized at Jain Heritage a Cambridge School to mark this occasion. All the activities for the assembly were conducted by the Teachers on 13th November 2021.

Teachers presented a skit enacting as children and showcasing a regular online class scenario.

It was followed by a rhythmic solo singing performance by Ms Satyasree and Mr Victor. The teachers also conducted quizzes and riddles for the students. The Principal Dr Mona Mehdi joined all the classes and wished the students on the occasion of Children's day. She asked all the children to be vigilant and stay indoors due to the COVID situation. Everyone was told that health is true wealth and they needed to take care of their health by following all the COVID hygiene practices.

## Special Assembly Presentation on World Kindness Day by Grade I

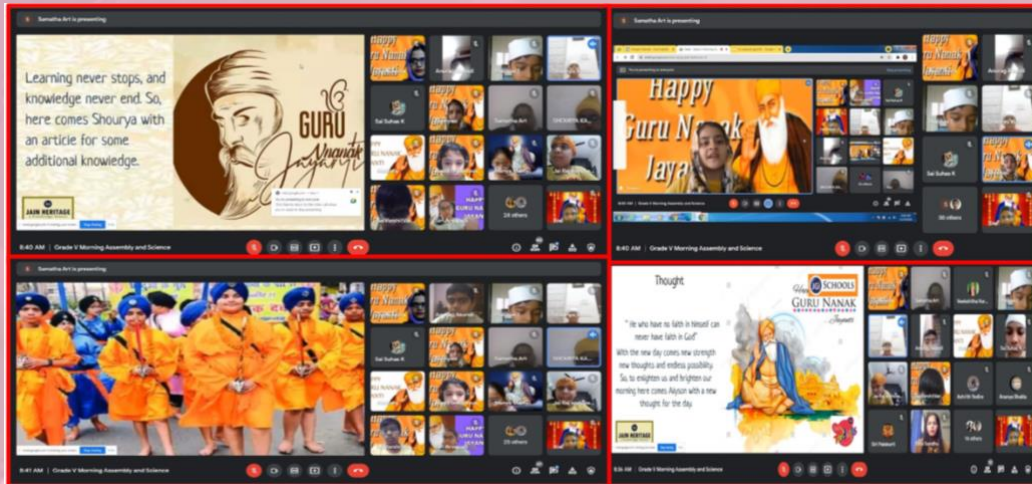

Kindness is defined as the quality of being friendly, generous, and considerate. Affection, gentleness, warmth, concern, and care are words that are associated with kindness. While kindness has a connotation of meaning someone is naive or weak, that is not the case. Being kind often requires courage and strength. Kindness is an interpersonal skill, kindness is also about gently telling the truth when doing so is helpful to the other person.

Special Assembly on the topic of 'World Kindness Day' was conducted by students of Grade I on 15th November. The assembly started with a special prayer followed by the school song. Yuvan led us with the pledge. An enriching and meaningful thought for the day was spoken by Hridhaan. Word for the day was apprised by Siri. Ruhi recited a wonderful poem related to the theme with rhythm and rhyme. Puneeth presented an informative article on kindness. A mesmerizing dance performance was presented by Samanvitha and made all the students spellbound by her incredible moves.

The programme ended with a vote of thanks and finally with the audience rising for the National Anthem.

## Special Assembly Presentation on Guru Nanak Jayanthi by Grade V

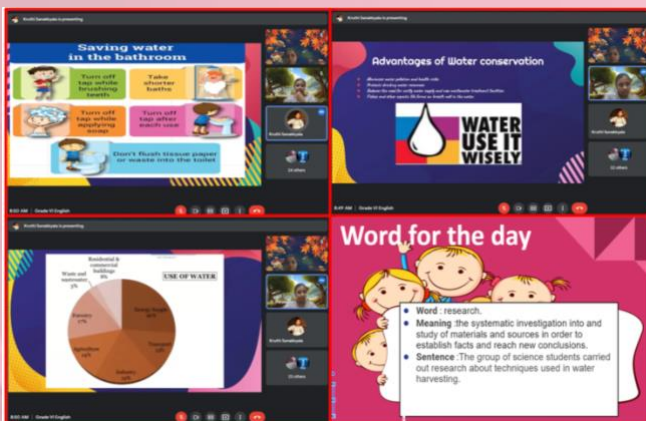

Guru Nanak Dev Ji says, "Everything happens by God's Grace; God knows better what is right or wrong for us. Hukam Rajayee Chalna Nanak Likheya Naal."

On 19th of November, the students of class V organized a prayer meeting on Guru Nanak Jayanti and brought home the relevance of the festival to our young generation. The assembly

was well conducted by Shaanyu as the anchor. It started with the prayer 'Ek Onkar'. The serenity and calmness floated in the air and paved a way for a very fruitful day for all. Everyone pledged for the nation with Prabhav. Tejasree inspired everyone by sharing good thoughts as God is one and coming in human form by showing the right path to everyone. Suhas shared the new word and encouraged everyone to live under the command of God. Shreyasi recited the Dohas by Guru Nanak Dev Ji. She explained it to pay reverence at the door of the Almighty. Shaurya emphasized on the facts related to Guru Nanak Jayanti. Jairaj explained the three teachings of Guru Nanak Dev Ji to everyone with an explanation. A special guest, Ms. Ekta Sandhu from Punjab graced the assembly. She shared the information about Gurunanak Dev Ji and Parkash Mahotsav. It was a pleasure to know the history of Sikhism from her. Headmaster Mr. Mahesh explained the importance of "Guru" to the students. He appreciated the students for their excellent performance. Coordinator Ms. Shuchita explained the teachings of Guru Nanak Dev Ji. If there is one God, then there is only His way to attain Him, not any other. One must follow that path. "Worship not him who is born only to die, but Him who is eternal and is contained in the whole universe." The assembly culminated with this great thought.

## Assembly Presentation by Grade VI Topic: Jal Shakti Abhiyan

"A river is more than an amenity; it is a treasure."

-By Justice Oliver Wendell

Grade VI students conducted the morning assembly on the topic "Jal Shakti Abhiyan" from 22<sup>nd</sup> to 26<sup>th</sup> of November, focusing on saving and conserving rainwater with the theme "Catch the rain, where it falls, when it falls". Every day of the week was planned and utilized for knowing about water harvesting, deforestation, afforestation, and the importance of water.

An article on different ways of harvesting water both traditional and modern methods was explained by

Mahitha. A poem on the importance of water was recited by Anutara. A river can be without any life, but life cannot exist without water.

Sai Kruthi and Sai Harshitha described elaborately water conservation through an informative PPT. We showed posters on water conservation and water harvesting. We understood that without water there is no life. We wrote slogans on water conservation. Throughout the week, there was great learning. We all adored and enjoyed several activities conducted during the morning assembly.

Prithvi Raj Paul  
Grade VI

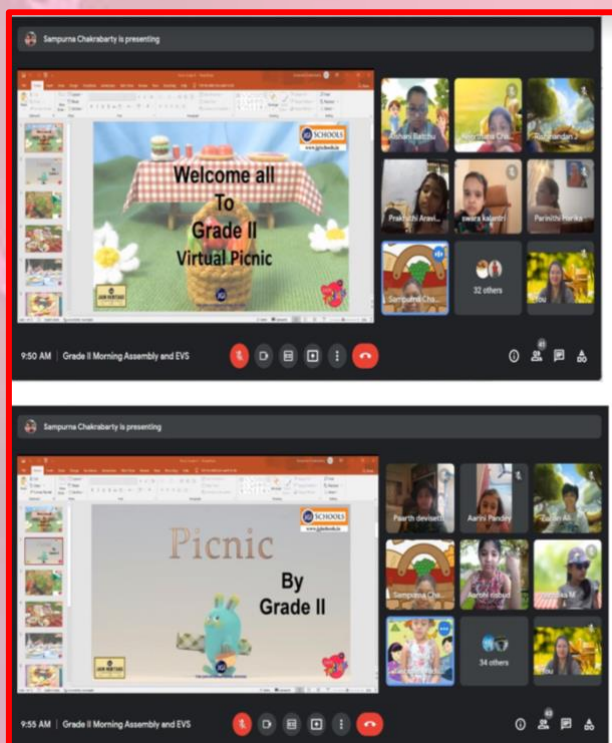

## Assembly Presentation by Grade X Topic: Optimism

Optimism is act of looking forward to hope in every situation no matter how difficult or challenging it may be. Optimism is an instrument that instils hope in us. The ones who are optimistic make the best out of any situation and in turn become extremely resilient. Optimists helps us deal with failure, loss, and other negative scenarios which we may come across. Some consider optimism to be ignorance, instead it is the choice we make to see through a negative scenario.

With this optimistic thought grade X conducted an energetic assembly from 8th to 13<sup>th</sup> of November on the topic "Optimism". The assembly started by invoking the blessings of the Almighty, followed by our inspiring school song. The pledge was administered with pride which has uplifted the fervor of patriotism. Beautiful and inspiring thoughts were shared every day during the assembly had filled every day's atmosphere with a positive air. Lexicon of words shared during the assembly enriched the vocabulary. News shared every day kept us updated. To reduce the stress, we practiced meditating with a soothing song. Every beginning has an end, likewise the assembly ended by singing the national anthem. Optimism can be applied to almost every situation in life, and it proves extremely beneficial as well. So, Stay Optimistic. Stay Composed!

## Virtual Picnic: Grade II

"Everyone needs a picnic every once in a while." Schools are a second home to the children and an important part when they grow up in their lives. A school is a place where a child learns how to dream, and how to follow the steps that lead to his destination in life. But among the vigorous hard-working days, even the students yearn for a break where they can laugh limitlessly and find ways to succeed seamlessly. Teachers of Grade II arranged a virtual picnic for the students on 29<sup>th</sup> November 2021 on the Google platform. All the students participated very enthusiastically. They got many varieties of dishes and healthy food like Dosa, Mini Idli, Paratha, Roti and Sabzi, Millets, Oats and also fruits. They shared information about the basic ingredients used in their cuisine. Students spoke about the health benefits of homemade food. They learnt about different nutrients which they can get from different food items. They also learnt about how their growth and development is taken care of by the healthy food items.

## Awards & Rewards

We are glad to share this fantastic news with everyone that Principal of JHCS KP and the Secretary of the Academic Council Mrs. Mona Mehdi has been conferred with an Honorary Doctorate for her contribution in the field of education. Congratulations Dr. Mona Mehdi.

JHCS Kondapur proudly congratulate Dr Mona Mehdi for receiving "Principal of the year Award" for the year 2021

JHCS Kondapur proudly congratulate Sahasra Paravada of Grade III for receiving silver medal in long jump event and Bronze in 60m sprint event in U-10 category in the "2nd Bhavins Athletics Championship-2021" conducted by Bhavins Sports Foundation at Gymkhana Grounds, Secunderabad.

**JHCS Kondapur proudly congratulate all the teachers for receiving the Term 1 awards, 2021**

## View the Review

One more step is a memoir of events that led up to the world's largest contingent of school students to reach the Everest Base Camp. The book is narrated from the point of view of Chandrashekar D P, CEO of JGI schools.

He recalls his meeting with Jaahnvi to organize the journey , persuading the parents of the pupils and training them, followed by the actual climb to the Everest Base Camp.

The readers get to read about the arduous tests conducted to pick the diamonds out of the rough for this endearing trip. They also get to read about the intensive training programs the students went through during g their preparation which included three phases - Motor skills and capacity building, rock climbing and jungle training. We are given an in-depth description of the energy draining yet e citing travel on the way to Kathmandu. Going forward, "One More Step" recalls the calm, dangerous, and majestic scenery of Nepal and the Sagarmatha. It gives us a glimpse into what goes inside the head of a mountaineer while on an adventure. The detail in which every moment is described honestly transports the reader into the pages of the book.

Throughout the entirety of the book, three principles are remembered, they are - discipline, dedication and determination. The way the students took charge when needed and maintained themselves on the strict regimen on that of a mountaineer's is truly inspiring to other kids. Overall, I was truly engrossed in the book and all in all loved it.

### IF I WERE THE PRIME MINISTER OF INDIA

If I were the prime minister of India, I would give world-class health services to all the citizens of the country.

I would ensure social security. I would give importance to education for the poor and needy people in our country. I would make sure to provide quick justice in all cases in courts.

I would construct world-class infrastructures such as roads and buildings. I would take all measures to control environmental pollution. I would give importance to cleanliness and hygiene and implement controllable measures throughout the nation. I would also develop tourism projects which will attract more tourists and generate income for the local people of the country.

### Gazing at the starry skies!

When I was in class IV, I along with my classmates and teachers went to Birla Planetarium by bus. On the way, we sang songs and played games like word building, atlas, and shared snacks.

We reached the destination and had our lunch near a park right there. Then we went inside a large room with a dome-shaped ceiling and many seats. There was a special projector which projected images of beautiful stars and other objects in the night sky on the domed ceiling. I enjoyed seeing them. After that, we saw a clip with 3D glasses on aquatic animals in a different hall. We then returned to the bus and started our journey back to the school. While going, we spoke about what we liked in the planetarium. It was a nice experience.

## Our Alumni Speaks...

I'll never forget my time at JHCS KP. I studied there for 6 years and accumulated a myriad of memories there. The school helped me grow holistically by allowing us to participate in various co-curricular activities, numerous extempore competitions, and occasional projects that helped develop good researching skills. Being a part of the student council for 3 years also taught me a lot about leadership, responsibility, and accountability. Since I joined during the inception of the school, we always had a smaller class size compared to other schools. In hindsight, helped our entire class become very close to each other over the years and become one tight-knit group. We were also very close to our teachers, who would often go out of their way to help ensure that we understood the concepts well.

Some of my favorite memories include the annual day practices, the field trips where we'd often have hilarious encounters, the basketball matches, and finally the first extempore competition. The school helped me prioritize other aspects of my life apart from academics. It helped me hone my ability to manage time.

I'm grateful for everything I've learned there, and I'll always be proud to be an alumnus.

Mr. Nitin Bhoopal,

2014-15 Grade X Batch

Risk Analyst,

UBS (Union Bank of Switzerland)
